

How to use

Collect blood using a regular syringe and needle

1

Removing the needle, gently touch the **BloodCaptor™** to the blood at the syringe tip. The amount of blood required will instantly move into the collection window.

2

Removing the Mix Solution cap, insert the **BloodCaptor™** into the bottle and gently mix.

3

Insert cartridge into Reader, and then apply 4 drops to cartridge well

4

The handheld Reader will automatically display result at 5 minutes.
